

Polymer Chemist

Position:

A Polymer Chemist position is available at Bezwada Biomedical to support polymer process development and validation. Full time but flexible for part-time or contract position based on candidate availability.

Job Description:

- Conduct and support research efforts in bioabsorbable polymer development and validation
- Execute laboratory work plan developed with input from supervisor or senior team members and complete work on schedule.
- Record data and document observations in laboratory notebooks.
- Analyze experimental data, interpret results, and prepare technical reports.
- Draft technical documents such as protocols, methods, and certificates of analysis.
- Comply with safety and quality guidelines.

Qualifications:

- Bachelor's degree in Chemistry, Biology, Biochemistry, or related field.
- Minimum of 2 years of laboratory experience.
- Experience with bioabsorbable polymers for biomedical applications is preferred.
- Experience in polymer synthesis, methodology, and characterization along with a proven track record of problem solving.
- Self-motivated with attention to detail and ability to work individually and in a team environment.
- Excellent verbal and written communication skills.
- Enjoys bench and hands-on lab work.

The position is full time and on-site in Hillsborough, New Jersey 08844. Flexible for part-time or contract position based on candidate availability.
